DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 1-12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites the limitation "the lighting section" in line 13. There is insufficient antecedent basis for this limitation in the claim.

Claim 4 recites the limitation "the control field, the input data packet in line 5 and the information field" in line 6. There is insufficient antecedent basis for these limitations in the claim.

Claim 5 recites the limitations "the control field in line 3, the information field" in line 6. There is insufficient antecedent basis for these limitations in the claim.

Claim 6 recites the limitation "the control field" in line 3 and "the information field" in line 5. There is insufficient antecedent basis for these limitations in the claim.

Claims 10 and 11 recite the limitation "the first reference clock" in lines 3 and 2. There is insufficient antecedent basis for these limitations in the claims.

Claim Objections

Application/Control Number: 10/088,401

Art Unit: 2674

Claim 1 is objected to because of the following informalities: a display section has number (1) in the drawing and the lighting section has the same number.

Appropriate correction is required.

Allowable Subject Matter

Claims 13-32 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: the claimed invention is directed to a display apparatus. Independent claims 13, 15, and 24-32 identify a uniquely distinct feature "wherein the horizontal driving sections (3) are connected each other by signal lines and can communicate the data with the driving control section (4); the driving control section (4) adds identification information (23) to transferred control data to each horizontal driving section (3) corresponding to connecting formation of the horizontal driving sections (3) in the display section (1) and transfers various control data; and the horizontal driving sections (3) perform a lighting control of the lighting elements (11)".

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Kudo et al. teaches an upper display data driver circuit (403a) representing one section of the horizontal driver and a lower display data driver circuit Fig.17 (403b) representing another section of the horizontal driver. The liquid display controller parallelly generates display data UD7 to UD0 for the upper display and display data LD7 to LD0 for the lower display. None of the references either singularly or in combination, teaches or fairly suggests the underlined limitations above.

Art Unit: 2674

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jean Lesperance whose telephone number is (703) 308-6413. The examiner can normally be reached on from Monday to Friday between 8:OOAM and 4:30PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Richard Hjerpe, can be reached on (703) 305-4709.

Any response to this action should be mailed to:

Commissioner of Patents and Trademarks

Washington, D.C. 20231

or faxed to:

(703) 872-9314 (for Technology Center 2600 only)

Hand-delivered responses should be brought to Crystal Park II, 2121 Crystal drive, Arlington, VA, Sixth Floor (Receptionist).

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the technology Center 2600 Customer Service Office whose telephone number is (703) 306-0377.
